

Mnl Corp

Real world returns from real world assets.
Bridging conventional to digital with a
minimal barrier to entry.

mnicorp.io

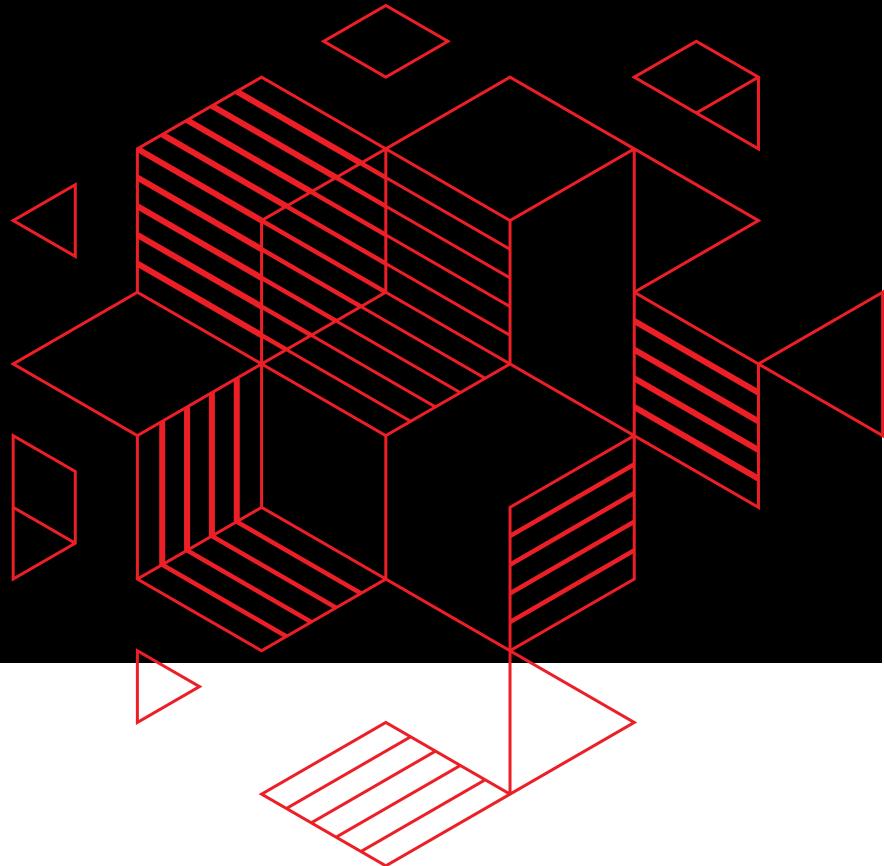

Introduction

Overview

Mnl is a multi-faceted tradable Utility Token giving the community a true Decentralized Finance Principled experience that brings “real world” commercial businesses with land-backed assets within reach of the crypto sphere for everyone to access institutional-like participation, interaction and direction within a multi trillion dollar industry. Giving you not only access but also directional control of the entity through a Decentralized Autonomous Organization. Global expansion using Governance oversight with a DAO and unique smart contract.

This allows total transparency for all holders at all times. The highest industry standards are maintained by using accredited accountants, risk assessment and management tools for due diligence, allowing the DAO to make informed decisions. Creating security, enhancing market conditions and liquidity by implementing the unique model allowing the Community to change or set parameters based on growth or needs. Included in this, the optional NFE Securities class which is APR generating and is insured and underwritten to back the registered asset portfolio.

Problems

The below problems are some of the most common challenges in traditional investments.

Illiquid

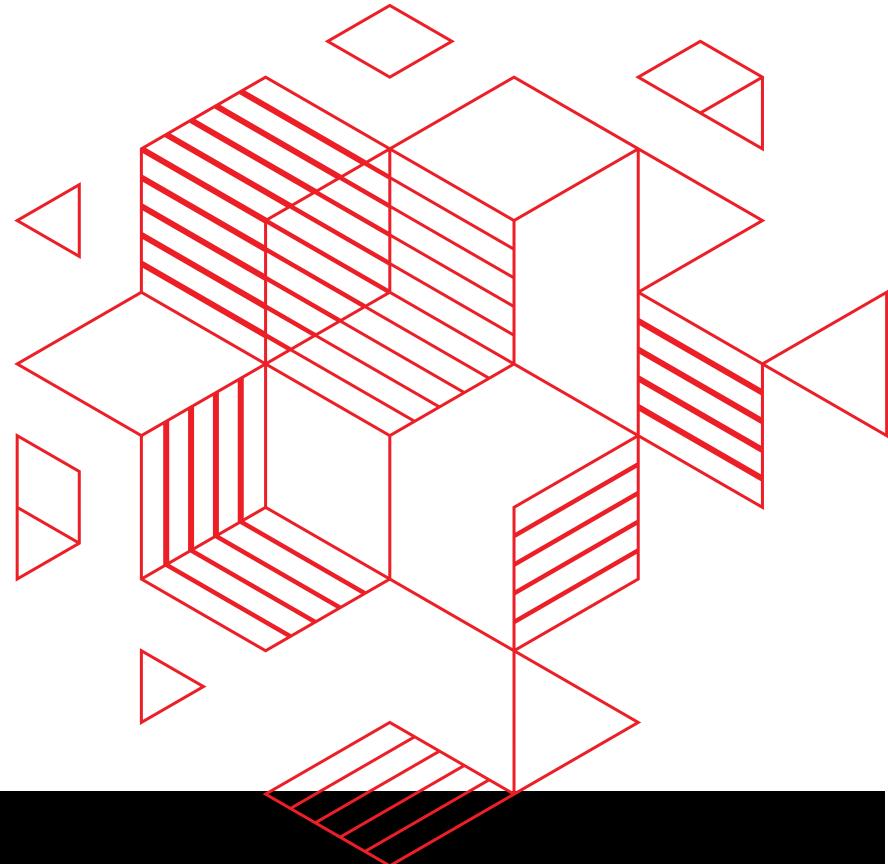

Private equity firm & Venture capital investment are time consuming and illiquid for investors

Inaccessible

Private equity firm & Venture capital investment only accessed by accredited, qualified and institutional investors.

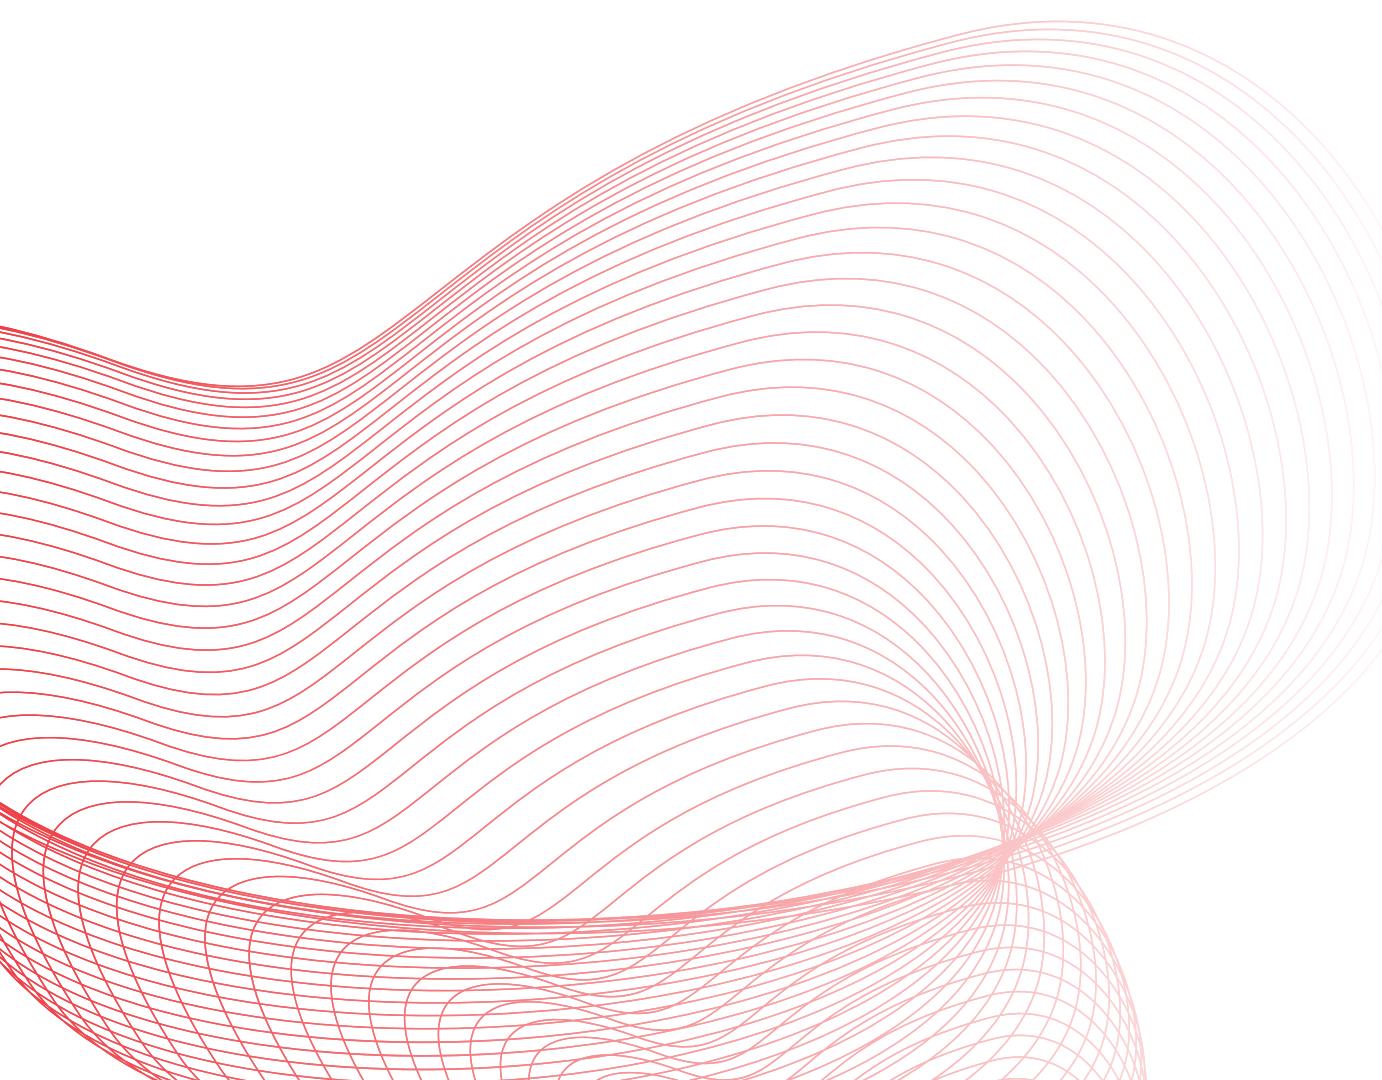

Imbalanced

The intent and reality of a DAO are often overshadowed by unbalanced voting, attacks and/or implementation structures that dilute community participation.

Solutions

The following are some of the solutions that Mnl's business model will bring to its community.

Liquidity

There is no deadline for the liquidation of funds and they can be managed more efficiently and offer greater returns for the holders.

Flexible Participation

The DAO community can enjoy redemption burdens with a democratized finance solution. Participation remains flexible with multiple DeFi options.

Simplified Tokenization

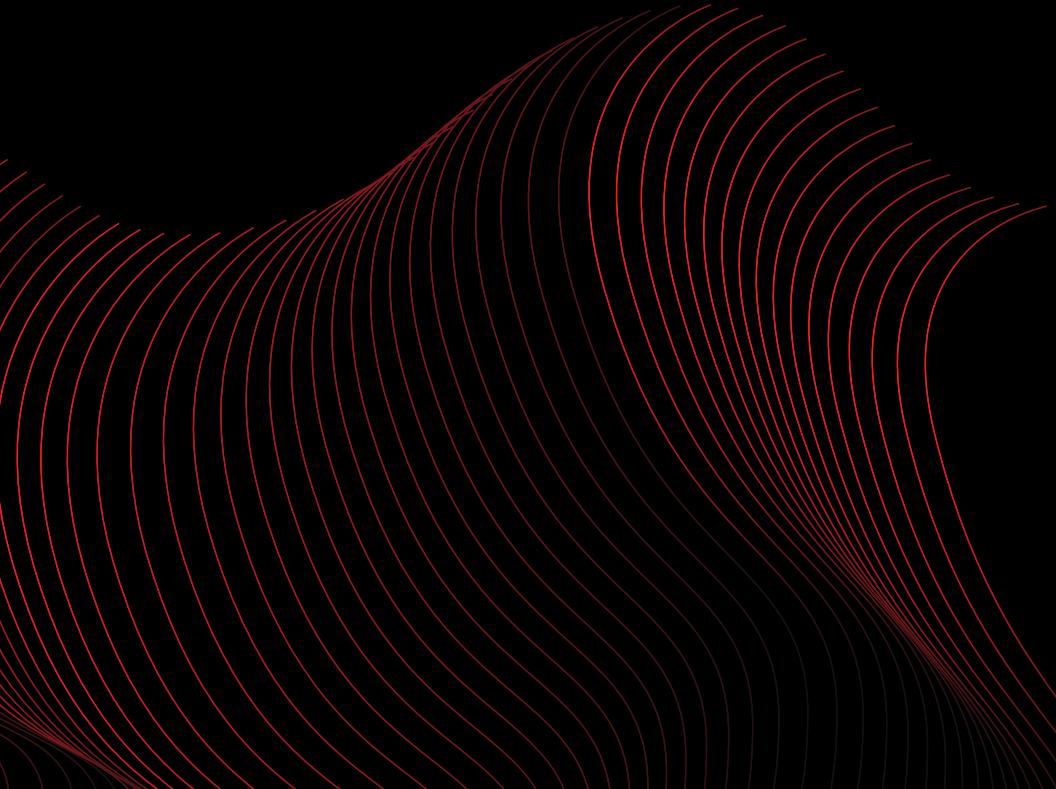

Tokenization allows entry barriers to be lowered so that more holders can participate.

Exchange

The Mnl business model expands by taking advantage of the developments not only within the crypto space, but also supporting exchange structures such as CEX's and DEX's.

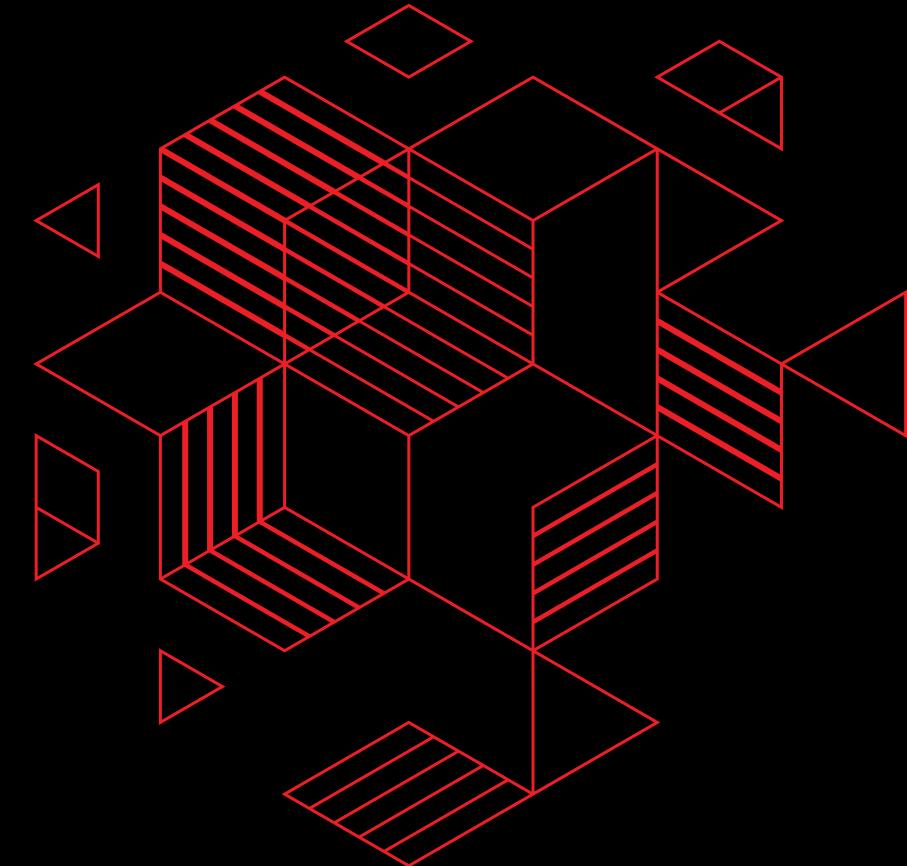

Mnl Utility

Mnl is a community-enhanced ecosystem smart contract token that is tradable on Centralized and Decentralized Exchanges. A DAO token with community involvement and interactions from inviting new participants to submitting opinions.

Smart Contract

Unique transparent proxy based smart contract built on Democratized Finance principals for all holder's benefit. DAO is able to set/change parameters and percentages to smart contract.

Governance

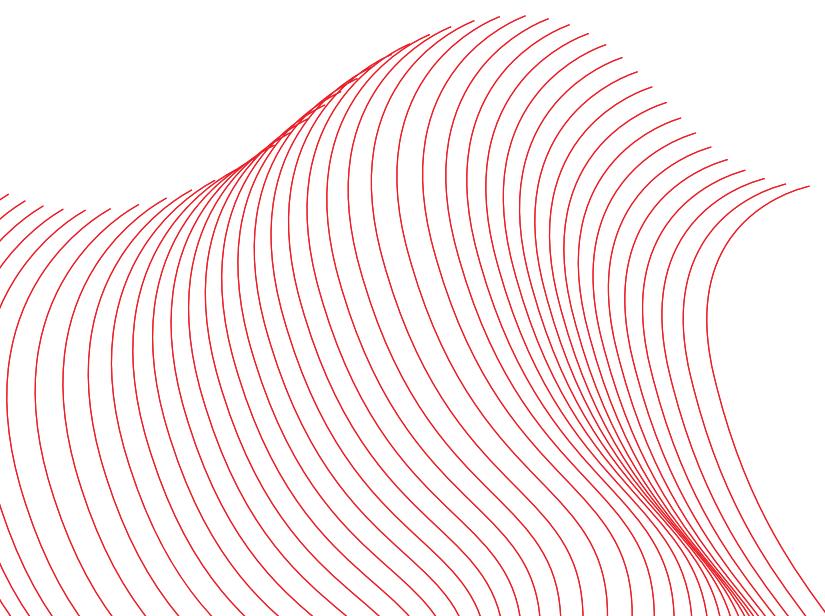

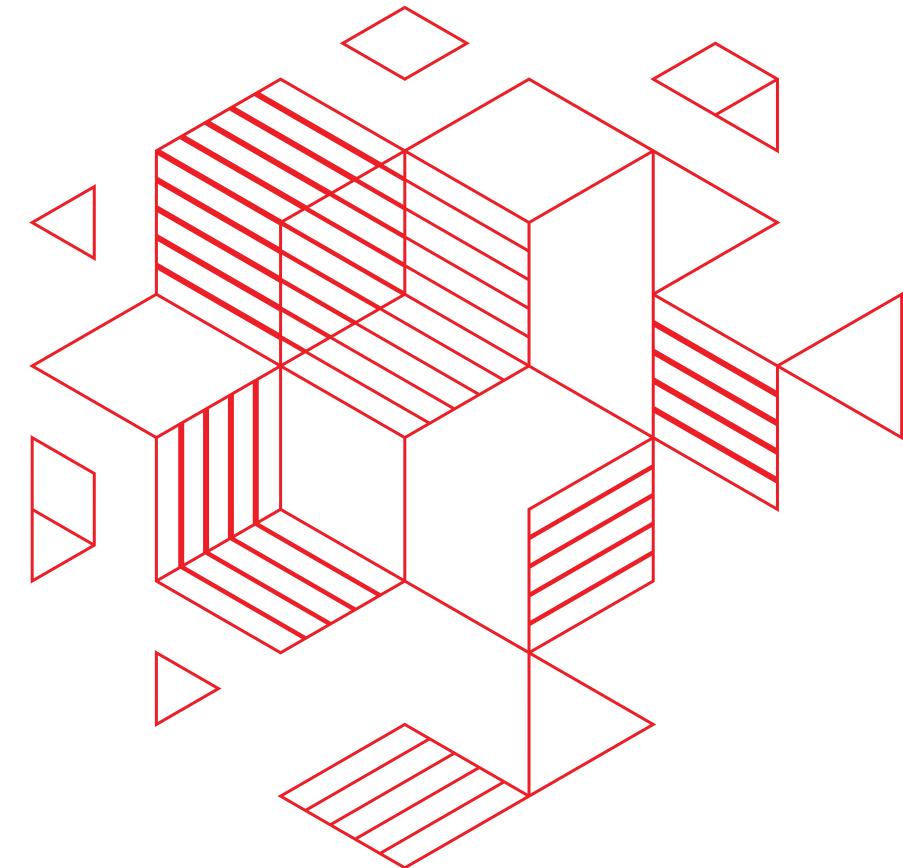

Mnl is a community-enhanced ecosystem smart contract token that is tradable on Centralized and Decentralized Exchanges. A DAO token with community involvement and interactions from inviting new participants to submitting opinions.

NFE (Non-Fungible Equity)

Non-Fungible Equity is a subcategory of NFT which will be fully registered as a securities class and insured to protect NFE Holders.

The NFE(Non-Fungible Equity) represents a portion of diverse real-world business assets and works to minimize risk, accumulate and distribute DeFi allocations in the DAO according to the governance portfolio management rules.

Additional selected NFE participation – An NFE (Non-Fungible Equity) is created by storing Mnl tokens. The NFE is fully transferable and can be staked to earn APR in Mnl Token pegged to USD Value.

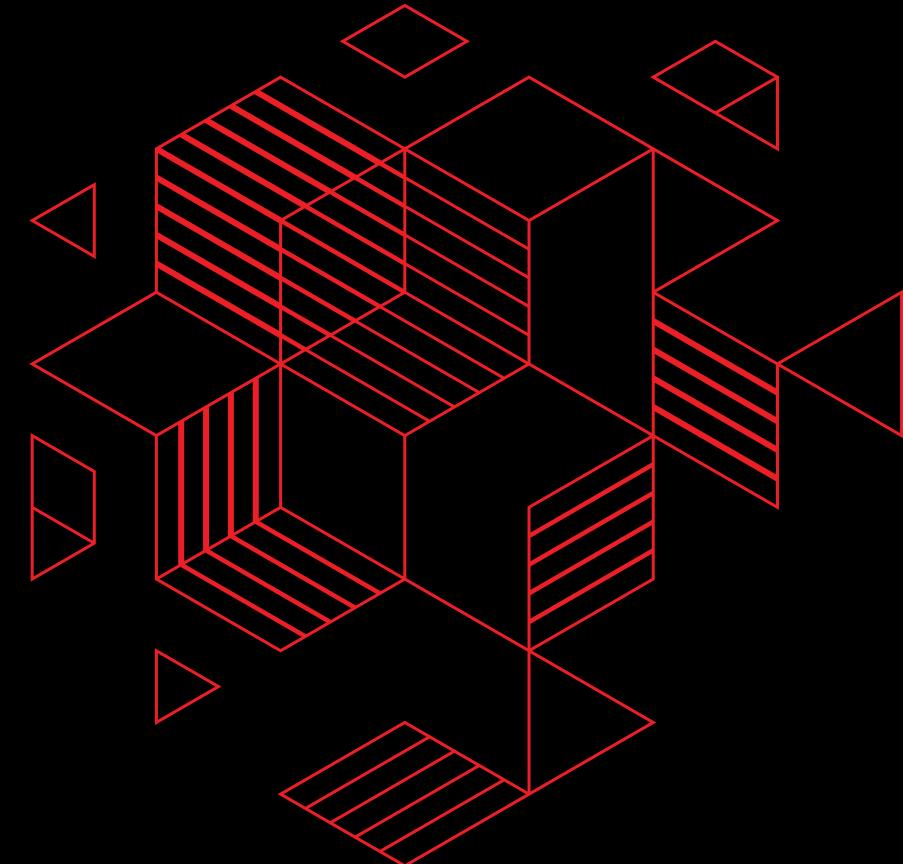

NFE Minting

Mnl token can be exchanged for an NFE for safety and security and to reduce taxes if moved or traded.

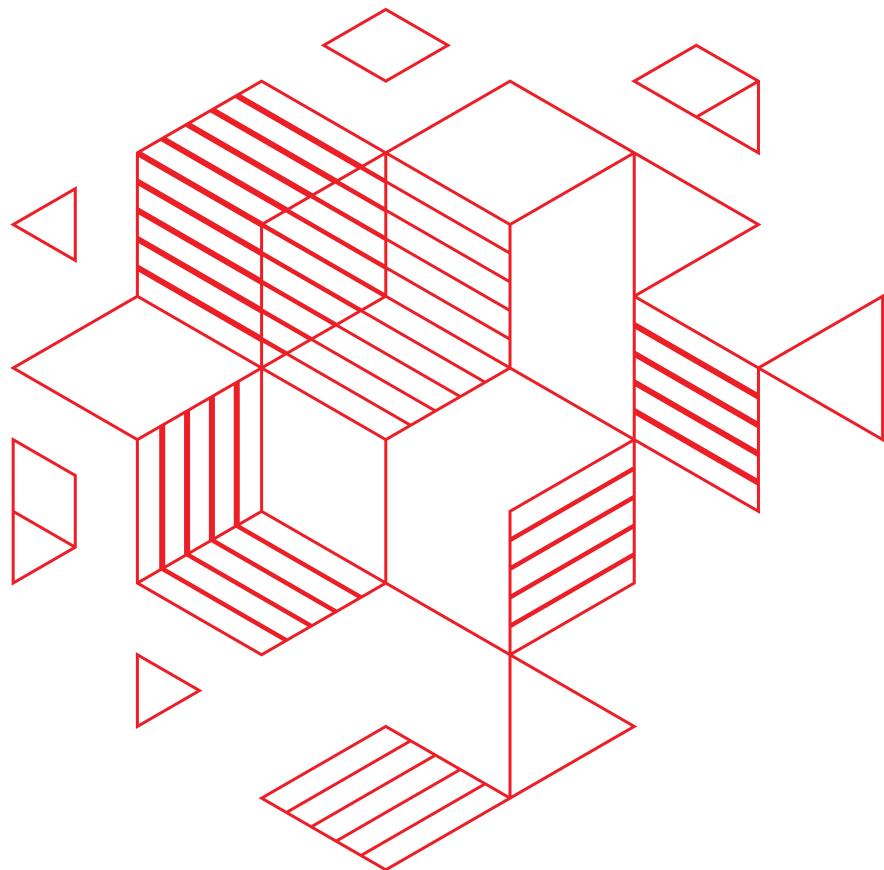

Staking (APR)

Optional Staking of NFE allows participation for APR which is pegged to dollar revenues.

Governance Structure

Total Governance Tokens totaling 1 Million, Trustee to hold 100K on behalf of and manage distribution to Community using a dilution model of issuance. Treasury Governance wallet to hold supply of unissued supply and Trustee on requirement on behalf of Community can withdraw from supply for community distribution, balancing or rebalancing can be applied in the interest of the community to ensure community is protected and overall integrity of ecosystem is maintained.

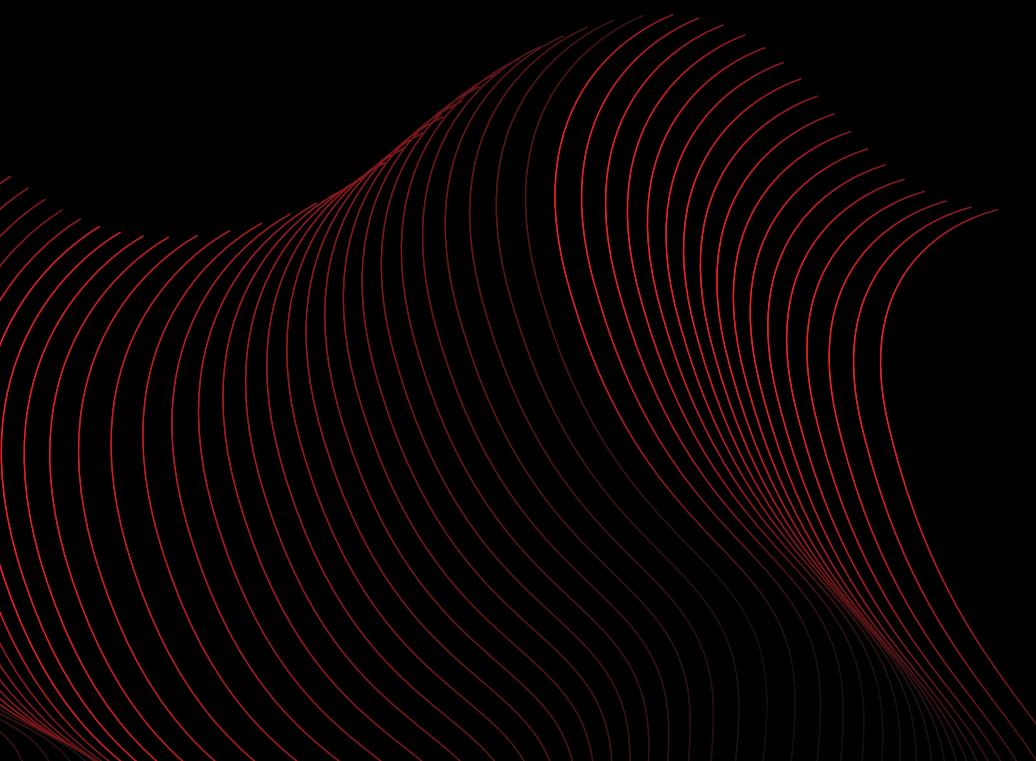

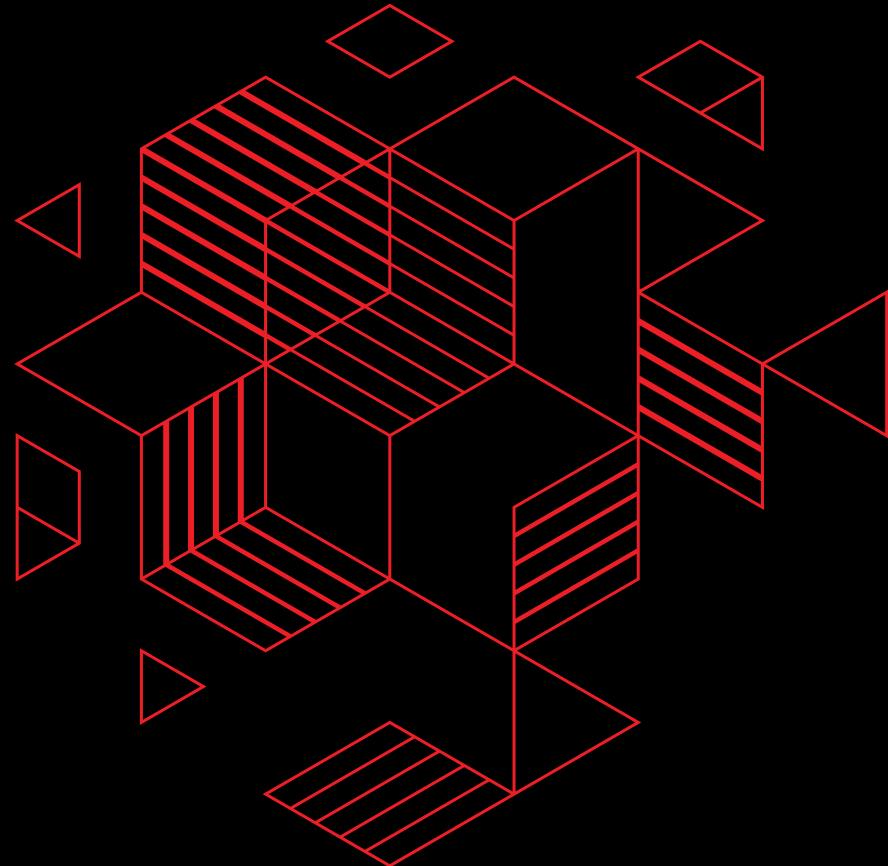

Token vote weight based on Mnl held and staked

- (T1) 100 -10 000 x 1 Governance Token
- (T2) 10 001 -100 000 x 3 Governance Token
- (T3) 100 001 -1 000 000 x 12 Governance Token
- (T4) 1 000 001 -10 000 000 x 18 Governance Token
- (T5) 10 000 001 -ABOVE x 25 Governance Token

Entry Process

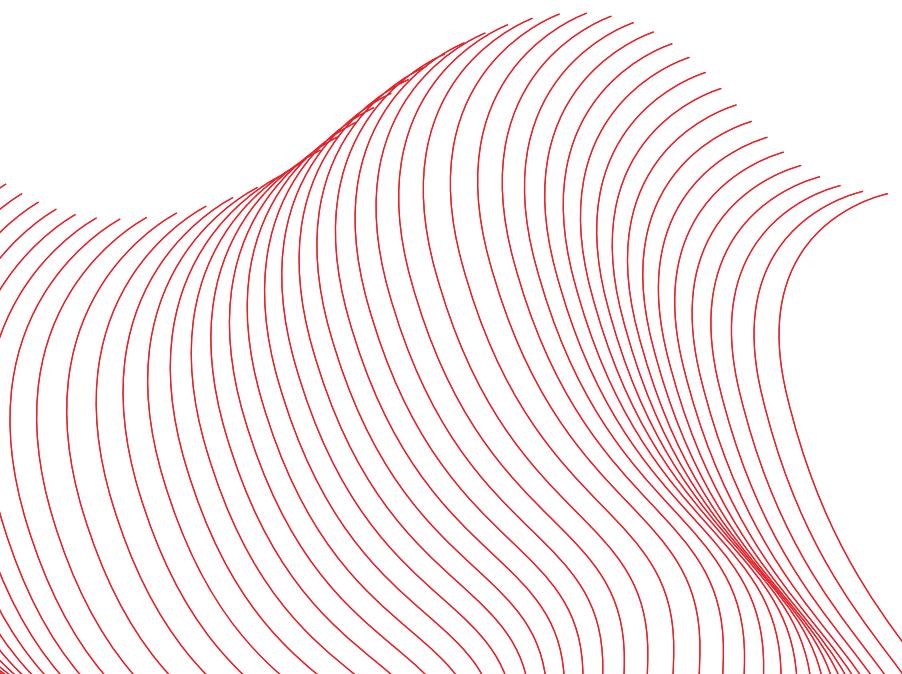

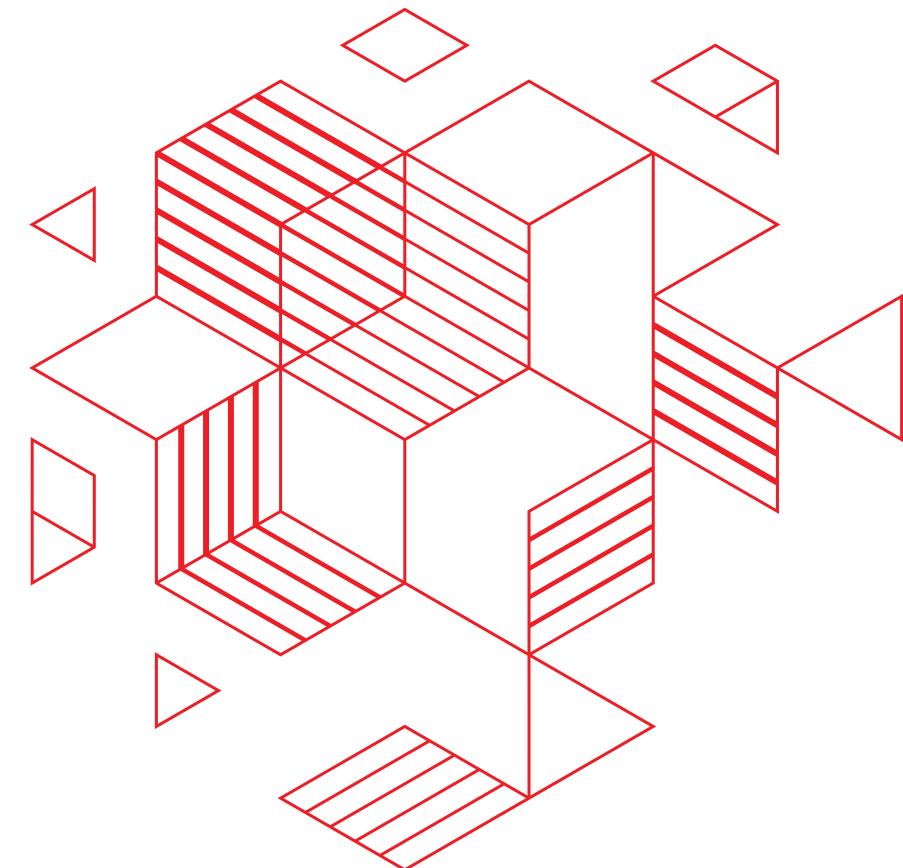

- User acquires Mnl token from CEX or DEX
- Mnl holder qualifies the Mnl token in the DAO creating Governance Token and DAO Rights.
- Mnl token can be stored within an NFE for safety, security and to reduce movement and transfer fees.
- Optional DeFi staking of the NFE will generate a variable APR.

Ecosystem

Three Elements:

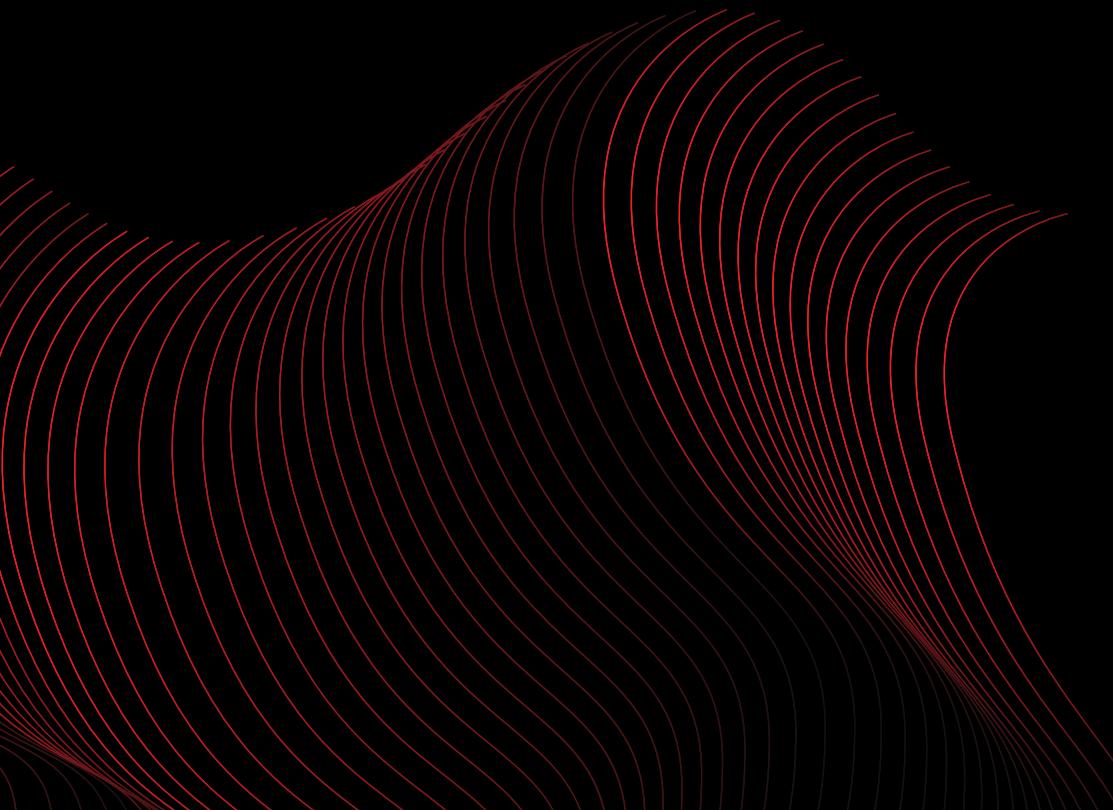

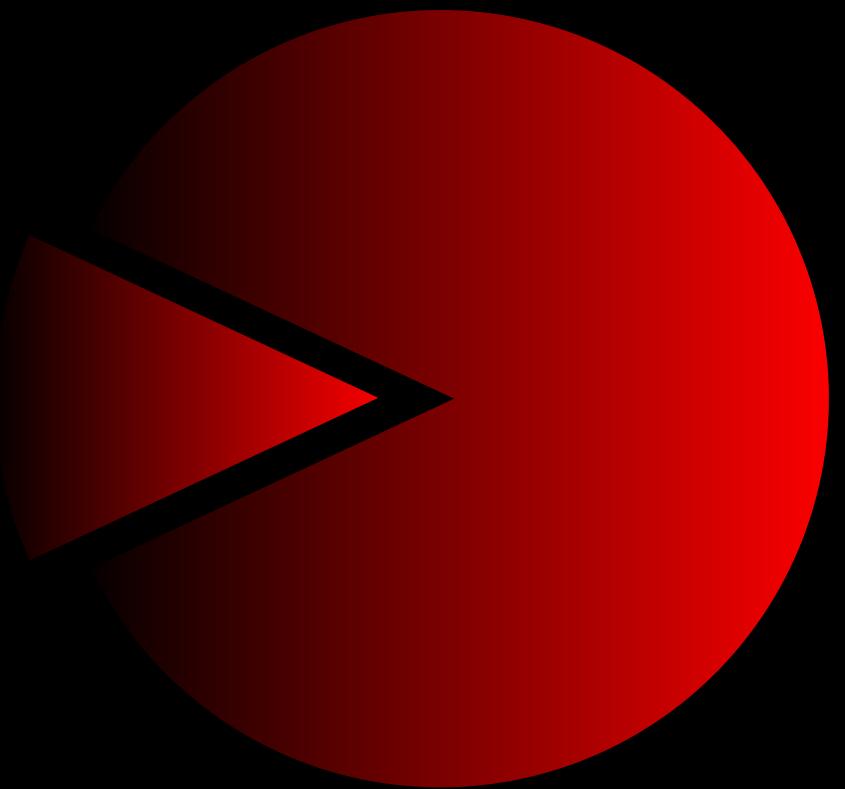

- **Holders:** Revenue staking is generated annually as over all % to the Mnltoken holders in the form of Mnltokens distributed quarterly.
- **Token:** The initial token listing value is \$0.10.
- **Company:** The revenue staking is generated annually from participation in businesses and the APR distributed per quarter.

Mnl Token Distribution

10 Billion Tokens Available

- 60% (DAO locked EcoSystem Reserves)
- 30% (DAO locked DeFi Allocator)
- 5% 3rd Party Reserved
- 2.5% Presales & Circulation
- 2.5% Founders (locked for 2 years)

0.5% Mnl Token Presales

20% Flat Pre Sales Discount @ \$0.08/Token with Listing
Price @ \$0.10/Token.

Vesting Schedule Presale 3-Months Locked

Month 4: Token holders qualify for 5% release of their token
in the fourth month.

Month 5: Token holders qualify for 5% release of their token
in the fifth month

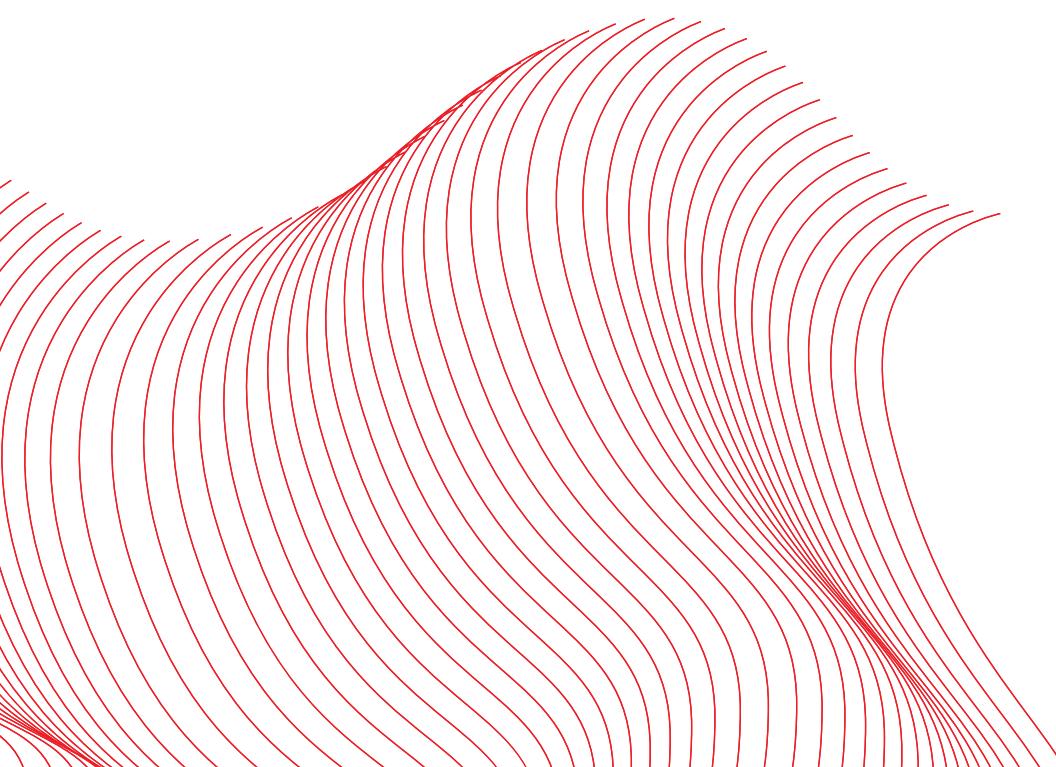

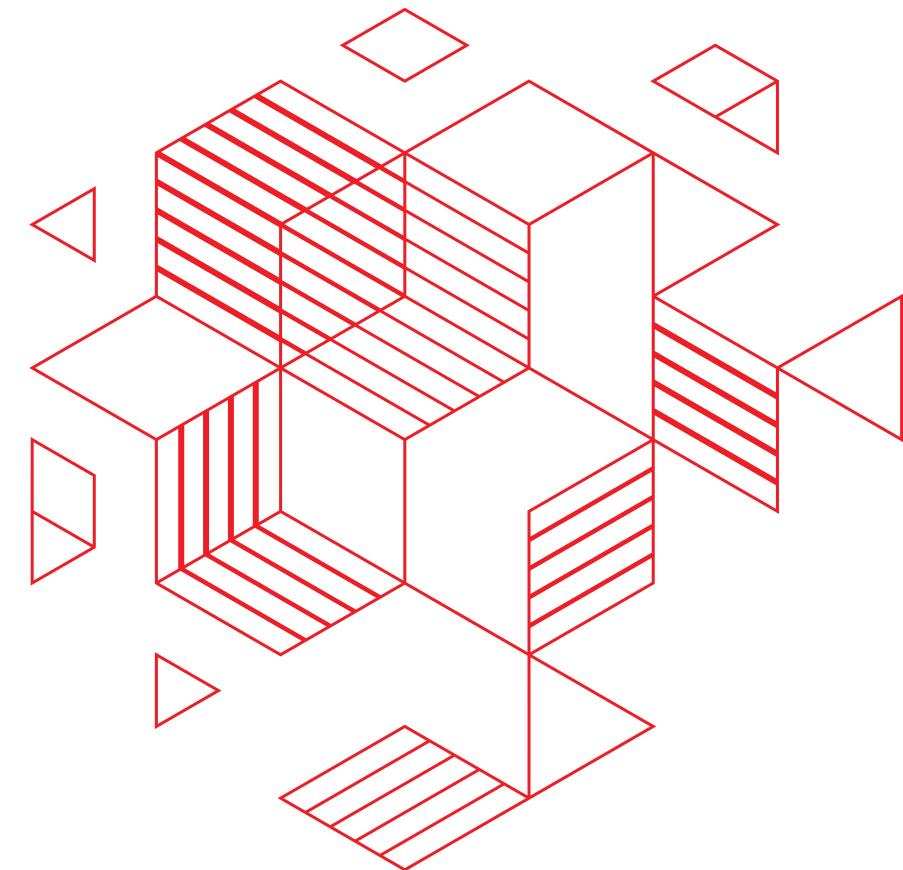

Month 6 onwards: Token holders qualify for 10% monthly
release of their token from the sixth month onwards until
fully unvested.

Strategic Partnerships

MNI employs a robust review process for active businesses of all sizes in the mining, infrastructure, hospitality, healthcare, and commercial real estate sectors.

Each company must meet the following criteria:

- Company registration certificate
- Audited Financial Report
- Tax clearance certificate
- Company evaluation
- Proof of operation
- Strategic partner contract
